

Provider Name	Rogers	Bell	Telus
Price	Around \$85-\$90	Around \$85	Around \$80
Highest Speed	1.5 Gbps	1 Gbps	1.5 Gbps

1. Our current internet provider is Rogers
2. My parents chose this because it was already popular, and its internet is good quality, it has a reasonable price, and has good customer service
3. I would also choose Rogers, because of the same reasons my parents had, and in my opinion it is overall a good internet provider with great benefits, I enjoy its speed and I think its price is reasonable which would help for me and my family

4. This is effective, and the biggest effect is probably the ad showing how it is the fastest LTE network in Canada, which is definitely what anyone would be looking for when choosing internet providers, especially because of its good price.
