Activity Software

By: Filo

Name the features of your workstation environment that you feel are effective or positive.

The operating system I am using is google chrome

Name the software program(s) you use most often and why you use them?

I mostly use google docs, I use them mostly for school work as that is how most of the teachers assign any work or material online

Name the icon you use on your graphical user interface the least. Explain why you rarely use it.

The icons I use the least are the unique icons whenever you look for a product online. This is because I am not the one ordering in the family as it is mostly my parents.

Are you connected by a network? Do you know who your network provider is and what tools (hardware and software) you use to connect to your network?

I am connected by a network, my network provider is rogers, tool I use to connect is the modem

Name the features of your workstation environment that you feel are effective or positive.

The atmosphere around it and how it is comfortable enough to have a positive impact and effect.

Identify what should be changed to improve your workstation.

The desk and chair material could change into a less rough way and become a more soft type of furniture to help improve the workspace
